

Meal Tracker® Multi-Lane Point of Sale

Option 1: 560T Serving Terminal

- **Powerful serving functions without the space requirements of a computer!**
- **Simple operation . . . cashiers learn in a few minutes!**
- **Up to 32 terminals may be connected to one host computer.**
Supports all input devices.
- **Wireless option -or use standard category 5 cable.**

The Meal Tracker® 560T Serving terminal features a four-line display, giving your operators the information they need to *keep the line moving*. Information entered on the 560T is automatically transferred to the host Meal Tracker® computer *in real time!* This means you will not lose data in cases of sudden power loss.

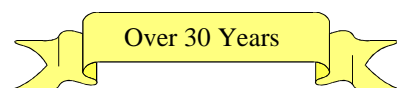

Light and portable, it's ideal for lunchrooms that are used for other school activities.

Powerful features include:

- 56 keys allow you to program up to 112 items for both breakfast and lunch.
- Student name and PIN number displayed on all account transactions.
- Ability to search by student name or PIN number.
- "Split Cash" option allows your students to pay cash for a portion of their meal, and the remaining balance will be subtracted from their account.
- Accepts cash transactions quickly. "Amount Tendered" key shows change due.
- Ability to print payment reminders and receipts (with optional POS printer).
- Ports for two input devices. PIN pads, hand-held scanners, and drag-thru card readers available.
- You'll be able to delete your last transaction with the "Delete Last" key.
- Cash, check, and check number can be indicated when crediting an account.
- User identification and password are required to log on. This prevents unauthorized use.
- Offer vs. Serve automatically converts qualifying a la carte items to a reimbursable meal.
- Operator prompts give you the ability to control second meals, charges, disallowed purchases, etc.
