

Meal Tracker® Single-Lane Point of Sale

For schools with a single serving line;
emphasis on simplicity and ease of use.

Economical, yet state of the art!

- Serve using a regular PC and keyboard (use of mouse during serving is not required).
- OR, those schools with a large a la carte menu can serve using a serving keyboard with helpful shortcut buttons.
- Touch-screen option
- Supports PIN pad, hand-held scanners, or drag-thru barcode card readers.
- Bright, colorful screen makes serving fast and easy.
- Student pictures option.
- Capture student photos, or import from student portrait CD.
- Offer vs. Serve signal lights show you immediately if a transaction is a la carte or a meal.
- Quick-Serve option allows you to serve meals quickly without special hardware. Ideal for elementary schools
- Audible warning signals for invalid PIN, negative balance, second meal service (with sound card).
- Patron name appears on screen, but not category information.
- Number of transactions and meals for serving period appears on screen.
- Real-time....you won't lose transactions in cases of sudden power loss!
- Name search or PIN search.
- Credit at the serving line...document if credit is cash or check.
- Meals served by PIN number require no key strokes by operator.
- Serve a la carte either to account or paid by cash.
- Split-cash feature lets you serve part of a transaction from a prepaid balance, and the remainder by cash.
- Delete Last key voids the last completed transaction.
- Quantity key.
- Works on local computer, or one that is networked (all popular network types).
- Easy, versatile reports
- Windows 95, 98, NT, 2000, ME, XP.
