

Meal Tracker® Student Data Exchange

Receives and sends up-to-date student data . . . exchanges updated information quickly & easily!

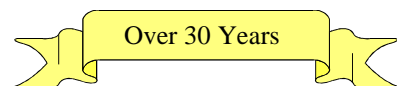

Student Data Exchange works with popular student attendance programs (SASI, Eagle, etc.) to receive universal student information. Does not require rigid fixed-field lengths! New information is available immediately in the Meal Tracker® Student Management Module and the Free & Reduced Application module.

- Information can be transferred via WAN, modem, or diskette.
- No need to memorize computer commands . . . all options are menu-driven and intuitive . . . *if can click a mouse, you can receive or send updated files!*
- Paths for data transfers are pre-defined in setup, therefore eliminating data from going to the wrong destination.
- Transaction logs record each incoming or outgoing file transfer between software modules.
- Free & Reduced status updates are sent to one or all school sites with one click (via WAN).
- Newly-enrolled students are sent (via WAN) to appropriate school's POS system . . . *they are available for service immediately the same day!*
- Works on most popular types of networks.
- Windows 95, 98, NT, 2000, ME, XP.
